Current Status

- **Introduction:**
  - Unilever owns 20 tea estates and 8 tea factories and employs over 20,000 workers
  - The company is considering wood-based cogeneration or other renewable energy options as a longstanding electricity supply solution for the Mabroukie tea factory whose current maximum electricity demand is about 700 kW.

- **Feasibility study:**
  - The company is seeking co-financing for a pre-feasibility study inclusive of a study tour(s) to comparable (around 1 MW) wood-based cogeneration power plant
  - AFREPREN/FWD sent them a list of consultants they could choose from to carry out the pre-feasibility study.
  - AFREPREN/FWD is following up on status of the above Planned Pre-Feasibility Study and the cooperation agreement they sent to Unilever tea.
  - Cooperation agreement not yet signed
